

NPDES authorization to discharge to waters of the United States,
Permit No. NM0022292 - Santa Fe WWTP

The applicant's mailing address is:

City of Santa Fe
P.O. Box 909
Santa Fe, NM 87504-0909

The discharge from this municipal wastewater treatment plant is made into the Santa Fe River, a water of the United States classified for Secondary Contact, Marginal Coldwater Aquatic Life, Warmwater Aquatic Life, Irrigation, Livestock Watering, and Wildlife Habitat. The discharge is located on that water at latitude 35° 37' 30" N, longitude 106° 05' 19" W. Under the standard industrial classification (SIC) code 4952, the applicant's activities are municipal wastewater treatment operations. Final disposition of the sludge generated involves land application. The sludge produced at the treatment plant will be taken to the following locations: Airport Road sludge disposal site adjacent to the wastewater treatment plant. A fact sheet is available.

The changes from the current permit include:

- New permit limits with a 3-year compliance schedule for Total Aluminum, Total Boron, Total Cadmium, Total Copper, Total Selenium and Total Silver
- A new permit limit with a six-month compliance schedule for *E. coli* bacteria.
- Whole effluent toxicity limits with a 3-year compliance schedule.
- Additional pretreatment program modification requirements.
- Monitoring requirements for Vanadium, Radium 226+Radium 228, and Adjusted Gross Alpha.
